## **BOOK SYNOPSIS**

DSM-5® Casebook and Treatment Guide for Child Mental Health updates the previous companion to DSM-IV-TR with new cases and advances from DSM-5 and evidence-based assessment and treatment in child and adolescent mental health. The book presents 29 cases written by experts in the field to provide readers with realistic examples of the types of patients that clinicians encounter in practice. Each case is accompanied by two commentaries from leading clinicians (including child and adolescent psychiatrists, psychologists, social workers, developmental behavioral pediatricians and nurses), who provide their perspective on diagnostic formulation and treatment recommendations, focusing either on psychotherapy or psychopharmacology. Experts draw from a combination of evidence-based assessment and interventions, biopsychosocial approaches, a systems perspective, and commonsense thinking. Thus each chapter provides an opportunity to see how field leaders would approach the diagnosis and treatment of a child or adolescent. The collaboration among the case authors and commentators yields an approach that is flexible and expansive enough to be of help to clinicians of varied disciplines working in child and adolescent mental health. Down-to-earth and engaging, DSM-5® Casebook and Treatment Guide for Child Mental Health is a rich repository of clinical wisdom that seasoned practitioners, clinicians early in training, and child and adolescent psychiatrists studying for their board exams will find extremely useful.
